

## **Infrastructure/Utilities (26 comments)**

---

*Lack of road and sidewalk maintenance.*

*The delicate infrastructure of Ansley Park is dismissed by developers and new home builders/owners that believe they can do whatever they wish without consequences to the Park.*

*When one person does something, it affects so many in this neighborhood. This is not well-known. The lack of an infrastructure map locating water, sewer and storm sewers on it means there will be more "accidents" when the city gives a Fiber or cable company license to drill. This happened at Yonah and Lafayette and also on Westminster, where the sewer backed up into a basement, forcing the people to move. Months later it is still not fixed. Ansley should have a "master plan" of phone, cable, fiber, storm sewer, sewer, water, underground electric and phone, and paving coordinated street by street. Why not?*

*increased stormwater downstream from new or enlarged homes and increased impervious surfaces;*

*lot coverage making runoff a huge issue.*

*some of the newer cable line are eyesore and not essential. surprised they were permitted .*

*I would LOVE it if we could organize a project to bury all our power and cable/phone lines throughout the neighborhood. Our beautiful old trees are critical to the charm of our neighborhood but they are a HUGE infrastructure risk the burying the lines would eliminate. Additionally, the Beautification Foundation could organize it for the residences through a tax-smart process. Win-Win!*

*lack of basic public services by the city (i.e. the city doesn't remove large fallen trees, doesn't pick up yard waste each week, etc),*

*lack of crosswalks, lighting*

*The street lamps do not work on 16th Street and Peachtree Street.*

*need of a few more trash cans in high pedestrian areas closer to Piedmont park and Peachtree*

*Eliminate impermeable street surfaces as much as possible and replace with plantings*

*the ill-conceived and dangerous bump-outs on Beverly Rd. The planning firm hired for this project failed. One of the bump-out pushes you towards the other lane on a blind incline. It probably looked good on paper but did not translate just like the problematic roundabout on Beverly at Polo Dr.*

*condition of Beverly Rd and speed at which traffic comes down it and size of trucks that keep wrecking the infrastructure.*

*inadequate round about @ Montgomery Ferry*

*Bad traffic circles*

*road conditions*

*The condition of the roads are not acceptable. Beverly needs to be completely repaved.*

*condition of Beverly Rd*

*Our infrastructure is crumbling, in particular Beverly Road is falling apart.*

*Litter- drive by and dropped by people going through and by*

*trash on 16th st*

*trash*

*I'd be in favor of increasing the size of the traffic islands.*

*Due to the taxes we pay all of these items are important. However, we do not see the city or our council person helping with speeding on Piedmont, homelessness which has increased in just a few years, cleaning of the area. The sidewalks on Piedmont are covered in trash. People throw trash in our yard. It will continue to get worse but we cannot get the attention we have requested to address these items. Seems like the belt line is more important than current taxpayer concerns*
