

## Noise (27 comments)

---

*vehicle noise, motorcycle noise*

*We just moved to Ansley in June of 2020. We have been "negatively surprised" by the loud noise of the helicopters overhead, street racing/loud cars, and the large number of really fast drivers cutting through the neighborhood. It is not exactly the peaceful, quiet neighborhood that we envisioned. The neighborhood must get in front of these issues or it may lose its appeal to new buyers.*

*Noise levels are becoming unbearable. Our houses are close together and the noise of lawn equipment, construction, and traffic is continuous during daylight hours. At minimum, need to encourage use of electric leaf blowers to reduce noise and air pollution.*

*Not very pleasant place anymore with constant noise.*

*constant noise from construction crews, landscapers and mobile detailing.*

*Noise from Ansley Square Bar Scene*

*Noise from Colony Square*

*constant leaf blowers*

*leaf blowers from too familiar gardeners roar through the neighborhood for hours every day spewing gasoline and noise and leaves on my yard and anyone who doesnt pay them*

*Construction noise Leaf blower noise*

*leaf blowers*

*Can we do anything about gas-powered leaf blowers?*

*Maybe gas leaf blowers could only be used on certain days of the week.*

*I'm concerned over noise pollution from blowers*

*noise of leaf blowers after 6pm and on the weekends,*

*Encourage use of electric lawn mowers and blowers. Make it a requirement of the lawn care professionals.*

*Quietness.*

*noise of helicopters flying overhead constantly*

*Increased jet fly-over noise pollution.*

*noise*

*Noise*

*noise*

*noise*

*Noise*

*noise*

*Work on reducing noise and pollution caused by leaf blowers*
