

## **Parking (21 comments)**

---

*No police enforcement of current ordinances.*

*Enforce street parking restrictions!*

*The lack of parking enforcement*

*complete lack of parking enforcement*

*Too many cars are parked on the streets. It appears that parking restrictions are not being enforced.*

*Since I cannot walk well and do not breathe well, I drove up to McClatchey Park (from Avery) to see my grandchildren. Wonderful to see the park full from so many from all over the city, but difficult to find a place to park with all of the ladies parking illegally under the signs so they did not have to walk across the street. When the two ladies parked, the park side was filled of more doing the same.*

*Winn Park entrance has lots of parking on the wrong side of the street and parking where the no parking signs have been damaged and never replaced. There should not be parking on both sides of Barksdale Drive.*

*Ansley becoming a parking lot for the beltline. Enforcement of Parking Permits, including 2 hr on parks.*

*Parking once the beltline is extended.*

*With the permitted expansions of the garden and colony square parking on 15th and Peachtree Circle has become unsustainable. It is increasingly free all day parking for workers and does nothing to address the cities desire to limit cars. Under COVID with parking suspended crowded parking starts before 5 am and runs all day long.*

*outsiders parking on our streets*

*continued encroachment of parking from non Ansley park residents*

*Botanical Garden and Piedmont Park parking. The people who park here for attractions outside the neighborhood flout parking rules and leave litter.*

*parking from Botanical Gardens, Peachtree corridor, etc.*

*parking by others going to Piedmont Park and Botanical Gardens.*

*parking*

*parking*

*parking*

*The development I am concerned about is not that on single or multi family homes but the large developments like colony square that are not required to include ample parking in their development*

*consider a restricted street parking spot for each resident*
