

Sidewalks/Connectivity (25 comments)

improve sidewalks

Let's focus on our sidewalks. They are in horrible disrepair

The hexagonal sidewalks are in terrible shape in many places and force people to walk in the street or risk twisting an ankle.

We still need some work on sidewalks!

Broken sidewalks.

Condition of some of our sidewalks

Safely walking on the sidewalks with my toddler - not having to go in the street to avoid construction or trash cans bc we can't fit our stroller or persons side by side- working street lights and obvious stop signs and crosswalks that people observe and obey alike

Sidewalks

Can children walk and play?

to be able to walk and enjoy Ansley's outdoor spaces

lack of maintenance

walkability

walkability

scooters parked on sidewalks and elsewhere, maintenance of correct sidewalk pavers (maybe have one preferred company so every paver install is consistent)

I am also concerned about proposed bike and scooter lanes as they bring lots of noise and garbage to the neighborhood. Bikers are often respectful however the scooters bring garbage and the scooters litter the sidewalks and front yard. I do not want to encourage this activity.

LIT Lanes

How we connect to the Beltline....

Beltline

Maintain existing sidewalks

Prefer bike paths but not scooters or other vehicles that can injure walkers or scooters that can be discarded throughout the neighborhood

Scooter, bike lanes at 15th are detrimental to traffic safety.

We need more & better sidewalks

Keeping people on safe usable sidewalks- and out of the street/ it irritates me beyond words to see people in the road when the sidewalk is available but they want to get short with someone driving and they are in the way and the wrong- keep the streets safe for everyone and stay on the sidewalk!!

Marking bike lanes- and push for scooters and small motors off the sidewalk but in a designated and safe clearly marked and light path around the neighborhood as opposed to through
