

Trees (50 comments)

More positive tree planting policy in our parks, streets, and, front yards - if nothing else in recognition of rising temperatures

We need stricter protection for our trees and green spaces

Ansley is a haven for wildlife, as climate change continues, Protecting, promoting and cultivating biodiversity in both parks and residencies will continue to make Ansley one of the most desirable neighborhoods in the city. The incessant landscaping pollution must be addressed, it will be the reason I leave Ansley. It's toxic.

It is very hard to preserve trees if Constructon damages the surface roots. Contractors regularly ignore this issue. Also, replacement trees need room to grow.

Hoping to replant hard wood trees

not planting for future.

When you look from a high rise into Ansley Park we appear to have a canopy of trees. It is slowly disappearing

Tree destruction

Mature trees aren't trimmed back as they should and impede sidewalks and power lines

removal of old trees

the removal of mature trees (tree canopy)

The continued removal of mature trees resulting in reduced tree canopy.

If buildings cover lot we will no longer have room for trees and will no longer be a leafy green community

A tree company that cuts down a tree without a permit should lose their license to operate in the City. A relatively small fine charged to a homeowner is not enough of a disincentive to prevent the destruction of irreplaceable trees.

Loss of trees, biodiversity of landscapes and Landscaping pollution

lovely old trees,

tree loss

loss of trees

loss of trees

Loss of old trees.

loss of trees

Loss of tree cover is a concern.

cutting down trees

clear cutting of trees

TREE LOSS

The tree canopy is being destroyed. Wildlife is being displaced.

The tree canopy is becoming extinct - all the reasons we love Ansley seem to be fading away.

The loss of mature healthy trees.

Removal of trees

losing the mature trees

Too many mature trees are being destroyed

decimation of existing tree canopy

Loss of trees

Loss of tree canopy

falling trees

And trees are nice but as we've witnessed at 34 park lane, large trees can be dangerous if they fall.

As far as protecting mature trees or any tree for that matter but we have seen a lot of older trees falling recently with so much rain. Are there plans in place to check the mature trees to ensure they are healthy and safe to the environment?

Mature trees are both beautiful and potentially dangerous as we experienced several years ago when many of Ansley Park's original oaks began to age out and fall during weather micro-bursts or draughts etc. I feel mature trees need to be addressed on a case-by case basis by the owner with aid from a professional arborist whether privately owned or in a City owned public park.
